Zenith

For members who reach the peak with the highest volume, “Zenith”

Between 500 Million - 1 Billion TRY — 0.12%

Above 1 Billion TRY — 0.10%

Finnova has four commission levels named after stars. When you register and start trading on Finnova, your level is Nova. Your level is automatically updated when your 365-day trading volume reaches the specified threshold for each level.

Example:

If, within any rolling 365-day period after registering on Finnova, you reach a trading volume of 110 Million TRY, your commission level automatically upgrades to Vega. You will maintain the Vega level for the following year. If during that year your trading volume drops below 100 Million TRY, your commission level will automatically downgrade to Astra.
